

# Inspection BodyCam Body-worn Video Recording

The Total Safety BodyCam is a body-worn video recording system developed for use in industrial environments. Users can record high quality videos with maximum freedom of movement, which makes it ideal for usage in confined spaces.

The live module makes it possible to stream live video images over 4G and 3G networks to command & control rooms, computers and mobile devices.

- High quality video and audio – day & night
- User friendly design - hardware & software
- Integrated and secure solution for wireless network and remote video viewing
- Integration with existing command & control infrastructure
- Data security, authentication & prevention of unauthorized distribution
- High level of reliability – rugged hardware & robust software design
- Modular & wide range of accessories

## WORKING MODES

- **Passive**  
The videos and snapshots are stored on the internal recorder.
- **Real-time local**  
The video streams are displayed in real-time on an iPad or laptop (2-way communication possible with the bearer of the camera).
- **Real-time worldwide**  
The video stream is lead to the internet and available on any PC through a web portal (2-way communication possible with the bearer of the camera).

## Video Inspection

Less people are required to be on-site, more insight and better assessment.

## Remote Assistance

Specialists can remotely watch and offer support.

## Video Documentation

Later reviewing of stored images, support for future reference e.g. for maintenance planning purposes.

## Lone Worker Situations

Support and remote assistance in potentially dangerous or complex situations.

## Your Benefits:

- Giving real-time instructions based on the live camera stream.
- Make snapshots of excellent quality and great detailing with just one mouse click.
- Video stream can be displayed at the manhole using an iPad.
- Communication with the user wearing an ear piece.
- Use the BodyCam for final inspections.

# TOTAL SAFETY<sup>®</sup> SOLUTIONS

**Safety. Everywhere.**

**Upstream - Midstream - Downstream  
Industrial - Mining & other  
Safety Solutions**

- Centralized Confined Space Monitoring<sup>™</sup> System
