

Gating Solutions

TEMPORARY ACCESS CONTROL

Mobile systems for temporary access control for **PEOPLE & VEHICLES**.

The Total Safety Gating Solutions provide quick deployable systems for temporary situations, with a same (or better) level of access control as permanent systems.

- Robust
- Plug & Play
- Immediately operational
- Advanced access control system
- Easy to operate

STAND-ALONE VS FULL INTEGRATION

- Use of our own state of the art on-board access control system | **Stand-alone situation**
- Connected to the access control system of the client | **Full integration** in the client's own access control system

PROJECT TYPES

- **Short-term (1 to 10 weeks)**
 - Shutdowns | Contractor entrances
 - Emergency situations
- **Long-term (as from 11 weeks)**
 - Industrial construction projects | Construction works on existing plants - The Gates are used to separate the construction site and the operational site.

Gating | Basic Unit

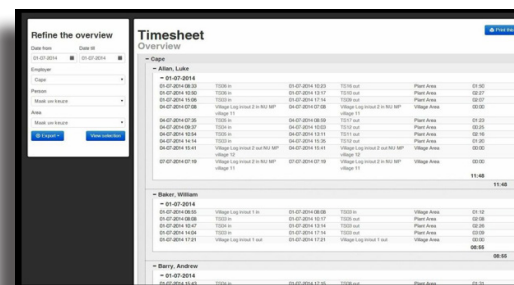

- Two full height turnstiles: capacity 1.000 people/hour
- Electrically operated door
- Integrated guard-office
- Robust
- Reliable
- Plug & Play
- Operational within one hour
- Emergency power supply

Features

- All the equipment needed to set up a functioning access control system is on board (card readers on the turnstiles, computer system, access control software).
- The emergency power supply will operate the access control system and the turnstiles for at least one hour.
- Steel shutters to close the unit off.
- Bars to connect fences on each corner of the unit.

Access Control Reporting

- Web portal of the access control data – online, real time available of attendances.
- Different timesheet reports possible.
- Automatic mail system with attendance lists.

Additional Features

-  **(1) Single turnstile unit V1**
-  **(2) Single turnstile unit V2**
-  **(3) Log-on / log-off point**
 - Access registration point for low risk situations.
 - Equipped with 1 IN reader and 1 OUT reader.
-  **(4) Electronic muster point**
 - Muster point for electronic headcount in case of emergencies and evacuations.
 - Fully integrated in the access control system.
 - Instant and reliable insight in number of missing persons.
-  **(5) People counter**
 - Large display indicating the number of people present in a certain area or group of areas.
 - Fully integrated in the access control system.
 - Essential information for rescue teams and fire brigades in case of emergencies.
-  **(6) Car barrier**
 - Robust & reliable
 - Plug & Play
 - No earthworks needed
 - Suited for every surface
 - Immediately operational after unloading from truck
 - Can easily be moved with a fork lift
 - Max. barrier length: 6m
 - Operation: remote control - integration with the access control system
-  **(7) Electric Sliding Gate**
 - Free hanging
 - Suited for every surface - No earthworks needed (only flattening of the surface)
 - Robust construction
 - Electrical operation
 - Max. opening 7m. - For bigger openings 2 gates of 6m are placed opposite to each other giving a max. opening of 12m
 - Operation: remote control - integration with the access control system
-  **(8) Electronic T-card system**

Advanced Options:

- **Passport / ID reader**
 - » Online authenticity checks (IR/UV)
 - » Indicates the documents a foreign worker needs to have to be allowed to work in a certain country
 - » Automatically reads and fills in the data in the access control system. No typing needed!
- **Automatic checks on expiry dates of documents**
 - » Automatic warning if expiry dates of ID's, certificates and other documents are about to expire
- **Registration of working hours**
 - » Reports of working hours per contractor, per company, per period of time (day, week, month, etc)
 - » Automatic warning when exceeding the maximum allowed working hours
- **Mobile badge scanner**
 - » Mobile in and out scanning
 - » Controlling badge usage
 - » Manual scanning at emergency muster points

Your Benefits:

- Effective and secure access to sites thanks to automatic controlled access with 24/7 overview of people and vehicles on-site.
- Advanced access control system with extended report capabilities and remote accessibility to data (e.g. fire brigade).
- Tailor-made solution thanks to high flexibility of the system and the use of mobile equipment.
- Easy and quick installation thanks to robust and Plug & Play system.
- Management information like working hours reports, occupancy lists, details on numbers of visitors on-site, etc.
