

# Specialized Safety Personnel Highly trained & experienced

**Even if you have already taken preventative measures to avoid accidents, unexpected situations can never be entirely excluded. Close supervision and adequate training during execution of works are therefore of vital importance.**

“Go for zero”: With this in mind, our safety professionals are committed every day to guarantee your safety and that of others. We discuss the risks with you beforehand so that we can advise you about appropriate prevention measures.

Shortly before works begin, our people conduct a LMRA (Last Minute Risk Analysis). Should unexpected yet unsafe situations or incidents arise, then Total Safety will react immediately and adequately.

## **PERSONNEL MANAGEMENT**

Complete range of well-trained and experienced safety profiles.

Safety organisation and coordination during technical analyses as well as day-to-day business.

**Expertise in high safety profiles.  
Greater safety thanks to:**

- systematic LMRA's
- regular safety campaigns
- detailed incident registration and reporting

**Optimisation thanks to:**

- on-site coordination & organisation
- innovative technological solutions

## **Safety and efficiency at work - always**

### **Large number of employees with flexible availability**

Thanks to our extensive pool of experienced safety employees, there is a good chance that we are able to take care of all your requirements as regards safety personnel. We are also capable of quickly bringing in additional staff – for certain jobs even within 24 hours.

### **Information, training and certification**

All our employees are fully informed and are aware of your operational and safety-related agreements before starting work on-site. Moreover, they have extensive experience when it comes to shutdowns and they are regularly trained as regards new legislation and techniques.

### **We are always at your service**

Customers with a permanent contract can reach us 24/7 for additional staff or changes to planning schedules. If needed, we can visit you on-site to discuss specific regulations related to your shutdown.

### **Fast offer, correct invoicing**

You will receive a crystal-clear offer from us. If you wish to be immediately assured of availability, you can reserve the required resources when ordering. Afterwards we will invoice in accordance with the performance sheets you have approved.

## **Are you looking for trained and experienced safety personnel?**

At Total Safety hundreds of employees are at your service. Even in the very short term.

Customers with a permanent contract can call us 24/7 for last-minute assistance.

## Rescue Teams

### Always on stand-by

In emergency situations, not everyone is capable of evacuating work areas that are difficult to reach. The experience and effectiveness of our rescue team members save lives at a time when bystanders have their hearts in their mouths.

#### Tasks:

- Setting up and executing rescue actions
- Study of complex evacuations from enclosed areas
- Checking and ensuring compliance with safety regulations
- Continuous supervision of a zone
- Evaluate work environment prior to the start of the works
- Corrective intervention in case of violations
- Reporting to management

## Gas Analysts

### Great expertise

A gas analyst shoulders a huge responsibility. For these jobs we only use our very best experts – with extensive experience in measuring and releasing enclosed areas.

#### Tasks:

- Specialised Ex, Ox and Tox measurements
- Checking and ensuring compliance with safety regulations
- Continuous supervision of a zone
- Corrective intervention in case of violations
- Evaluate work environment prior to the start of the works
- Reporting to management

## Safety Advisors level I, II and III

### The best cure is prevention

Our safety experts take responsibility for guidance, support and coordination of safety and prevention so that you can continue to focus on your core business, including for:

1. Projects for the construction of new buildings
2. Revisions & turnarounds
3. Everyday maintenance works

#### Specialties of our Safety Advisors:

- Incident analysis: identifying the causes of accidents and incidents in a clear and structured manner
- Safety coordination and supervision at construction areas/sites: support and guidance of contractor platforms, acting as intermediary between internal safety service and client,...
- Safety, fire and explosion safety: setting up emergency and evacuation plans, risk assessment and formulating prevention measures
- Safety and risk analysis: risk management within the current prevention policy
- Safety support for work safety: support of Internal Service for Prevention and Protection at Work
- Work preparation, kick-off and toolbox support
- ISO 9001 – SCC support

## Safety Supervisors

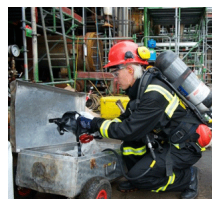

### Greater efficiency

The experience of our safety supervisors makes the difference between 'ok' and 'efficient'. Furthermore, our in-house training ensures that they can be deployed quickly and that they always find the right balance between safety and project progress.

#### Tasks:

- Checking and ensuring compliance with safety regulations
- Continuous supervision of a zone
- Corrective intervention in case of violations
- Evaluate work environment prior to the start of the works
- Reporting to management

## Fire & Safety Guards

### More flexibility

Call in one safety employee, get two qualifications. Our experienced safety employees are certified as fire and security guards. This makes planning easier and your team becomes more flexible.

#### Tasks:

- Continuous supervision of flammable works
- Preventative checks
- Checking permits
- Provide escape routes and ensure they are kept open
